

QR Based Inventory Tracking

- ✓ 1. REAL-TIME INVENTORY VISIBILITY
 - ✓ Instantly syncs scanned data (item codes, bin locations, serial/batch numbers) to SBO. | | Provides live inventory levels across warehouses, reducing stock discrepancies.
- ✓ 2. FASTER AND ACCURATE INVENTORY TRANSACTIONS: ELIMINATES MANUAL DATA ENTRY ERRORS DURING:
 - ✓ # receiving Material, # Inventory Transfers, # Delivery of material | | Speeds up scanning of QR-coded items using android based application.
- ✓ 3. SEAMLESS INTEGRATION WITH SBO MODULES
 - ✓ Works directly with Inventory, Warehouse Management, Sales, and Purchasing modules. | | Supports SBO document types (GRPO, Delivery, Inventory Transfer).
- ✓ 4. IMPROVED TRACEABILITY
 - ✓ Enables batch, lot, and serial number tracking via QR codes. | | Simplifies compliance with industry regulations (e.g., pharmaceuticals, food, automotive).
- ✓ 5. BOOSTS OPERATIONAL EFFICIENCY
 - ✓ Reduces time spent on searching items, verifying quantities, and locating stock. | | Helps warehouse teams perform tasks more independently and quickly.
- ✓ 6. ACCURATE STOCK AUDITS (UPCOMING FEATURES)
 - ✓ Enhances physical stock take and cycle counting accuracy. | | Automatically reconciles physical and system stock with scanned data.
- ✓ 7. SUPPORTS MULTI-WAREHOUSE AND MULTI-BIN TRACKING
 - ✓ Easily switch between warehouse locations and bins during scanning. | | Supports bin-enabled warehouses in SBO.
- ✓ 8. SECURE AND ROLE-BASED ACCESS
 - ✓ Integrates with SBO user roles and authorizations. | | Ensures only authorized users can perform transactions from the app.
- ✓ 9. MOBILITY AND FLEXIBILITY
 - ✓ Enables warehouse operations from Android devices or rugged scanners. | | Feature into iOS is upcoming | | Reduces dependency on desktops and printed documents.
- ✓ 10. SCALABILITY & CUSTOMIZATION
 - ✓ Can be customized to include QR scanning for:
 - ✓ # production Orders, # Label Printing, # Quality Control.
